The additional fee increases with vehicle registration further exacerbates the financial stress to every household, especially those households with more than two vehicles, to every business, small and large that utilizes vehicles for transportation of goods and services and employees. We can move money, change priorities, to fund the ODOT requirement without raising costs on the average Oregonian. We are already strapped financially to the point that we can hardly pay bills now. I also do not appreciate that Kotek is holding the special session on the Friday before Labor Day when MOST OREGONIANS ARE NOT PAYING ATTENTION. Cut the DEI Dept, move the money from the other failed Multnomah Cty projects to the roads and stop mismanaging the money we have already given you. Those are my suggestions.
