Do not raise taxes. We are already taxed heavier than almost all other States and yet we get the worst return on our taxes compared to almost any other States. Instead of using tax money on issues are the real responsibility of government and that benefit everyone, our government wastes money on pet projects and internal corruption. There is plenty of money for roads and infrastructure, more than enough, so spend it appropriately. Our State and local governments have put us into a doom loop and we will not correct by doing the same things that got us here, the definition of insanity.
