What a farce! ODOT has been out of control for years, always threatening, rarely providing! Roads are a disgrace in this state. The unprecedented Transportation bill that was passed years back, including the payroll tax, did nothing to help this situation. No more "new" taxes should be given until something can be proven, shown, done to convince THE TAXPAYERS that the funds have been and will be spent with trust! This state will continue to lose taxpaying citizens as more and more is done to discourage the citizens of Oregon. This beautiful state will only keep individuals here for so long. You will price people out.
