Please no more taxes. The rate of pay for the union jobs has far outpaced inflation and our state cannot afford it.

We continue to pay out more than our tax base can afford and yet get no better results. ODOT and our school system are the two biggest examples of this in my opinion.

Instead of throwing more money at our problems, let's look at states that do more with less. Idaho does a great job with its education budget. I am sure you can find states that do better with their road budgets as well.

As a 100% disabled veteran I get a break on registration of one vehicle but the other costs will be too much and I am being priced out of this state.

No new taxes. Live with what we already pay and do a better job of being responsible with the budget.
