Measure, Appointment or Topic:	LC 2

Greetings:

Again, we are witnessing our state government overextending their attack on the welfare and lives of the citizens of the State of Oregon with unnecessary and excessive taxation instead of leading our State to become more livable and secure. It is well known that ODOT has funding available to operate and meet their obligations to the public, but instead seek to hide the truth and force more taxation.

I stand in opposition of this session and am offended by the Governor's actions for additional taxation without merit.

Thank you
