No new road taxes. Spend it better. Take a look at the Hwy 26 Salmon River Road Safety Project. It has a 6 foot wide sidewalk installed a few years ago to make students crossing Hwy 26 safer. No student has ever been seen using it. Hoodland Fire department plowed it shut last winter. I have observed 3 bicycles use the pedestrian crosswalk signal and that is it. That is even worse than the Half Mile markers put in several years ago. The marker in next to that crossing is off 2/5 of a mile. If being off by 40% is good enough for ODOT, they could probably adjust there budget down by 40%, and that's good enough for Government work.
