Topic: LC 2

Please, do not burden my farm with any additional expenses. I am already unable to compete with producers in Idaho, Nevada, Utah, and in many cases California and Washington. I do not have the ability to absorb any additional costs of production. ODOT needs to live within its' budget. They don't have to cut essential services and personnel, just cut out a small percentage of the nonsense and they will be just fine. Oregon is putting too many businesses and agricultural producers out of business with its' ridiculous taxes, fees, and regulations. NO MORE!
