I am opposed to No New Road Tax.

Let me just put it simple

I pay \$2000 for rent

I bring home \$4000

half of my income goes to rent - that means I have to pay all my other bills with the other half of my income, car payment, insurance, gas, groceries, essentials, utilities, water etc.

I am like the majority, most of our income is going to living expenses and now the governor wants to put more taxes on us and /or take more taxes out of our checks. I already pay / my cost of over \$400 for health insurance that I can't use because I can't afford to pay co-pays and deductibles. Everything is increasing and most of us do not have any control over it. Fix the issue of this government managing money rather than taking more from the residents of this state. Just because the governor thinks it's a good idea the rest of us don't.

She should try and live on the incomes the majority of us do. More taxes mean bankruptcy for some, poverty level going up for others, and for those of us that were excited for the first time in our lives that we have \$20 left over, she seems to want to take that away. We the people, that did not vote for her, do not want her making decisions for us when it comes to increasing our taxes because she can't do her job. Manage ODOT correctly and we would not have to increase taxes.
