Funding

Measure, Appointment or  
Topic: LC 2

Oregon cannot afford to add to the already excessive taxes imposed upon those who actually work in this state. No new taxes of any kind -- be they gas, payroll, hidden as increased fees -- should be approved at this time. You need to take existing dollars and reallocate to balance the budget and pay for our infrastructure. Our roads are more important to the future of the state than other items you added in during the last legislative session. Cut other new items first, reallocate the dollars to infrastructure and be done. You're going to drive more residents and businesses out of the state with this tax and spend method.

NO new road taxes!
