Measure, Appointment or  
Topic: LC 2

It is a foregone conclusion that government can never get enough tax revenue. Maybe in this instance you should look to taxing electric vehicles than pay no gas tax and do not contribute to maintaining our roads. As well, maybe you should look to some efficiencies with DOT. How many times have you seen "men working" signs along the road and no one working. Maybe DOT needs an efficiency study to see how they are going. Maybe the state needs a DOGE to get their act in order.
