Please no new road tax. It is hard enough for me, a teacher of 20 years this school year, of a small rural school to provide for my family of 5. We loss our daughter last year, and almost lost my wife in the process. We are trying to make ends meet on one income, while trying to take care of the medical bills incurred from that. I have always worked any school breaks to help provide for my family, and this summer taking on more hours to take care of ongoing and past medical care from last year. I had an auto accident about a month ago trying to dodge a head on collision. Now we have more expenses medically and another car payment as a result of that. I know others are going through difficult times as well in this state with similar stories of trying to do the right thing daily and doing the best we can with what we have been blessed with. The thought of another tax is defeating, that more of my dollars would not be gong to my family and their future, but to the state. I already feel that I give enough to our state to help it succeed. I am opposed to this proposed tax.
