

Submitter:	Anthony Tautfest
On Behalf Of:	No Road Tax
Committee:	Joint Interim Committee On Transportation Funding
Measure, Appointment or Topic:	LC 2

There is no way a tax on anything or anyone in our state should be allowed for Transportation funding. You all had a chance to make a bi-partisan deal in the Legislative session earlier this year that would have addressed this exact issue and YOU CHOSE not to take advantage of a great opportunity. Oregonians are already burdened by the frivolous and uncontrolled funneling of our tax dollars into insignificant pet projects that were created by the Democratic Party to the benefit of individuals who abuse our generous social programs and make a lifestyle of living off the generosity of others without conscience. Oregon's Democrat led government has always, and will continue as long as they are in power, to "write checks" that overspend their taxpayers "checking account" without any sense of fiscal responsibility. State funding by the US Government is being withheld because of Liberals and Progressives who want Oregon to continue to be a sanctuary state for individuals who are breaking federal law (and have no constitutional rights) by having purposefully entered our country illegally or by purposefully illegally overstaying their visas. Now YOU want us to make up for YOUR misguided ideals, irresponsible platforms and misaligned priorities by making the responsible, hardworking people of Oregon pay more taxes on gas and payroll etc.. I am not willing to cater to SOCIALIST ELITES and PROGRESSIVE USURPERS who want to force me to pay homage to them so that they can continue THEIR fiscal irresponsibility and frivolously spend funds that they don't have, all in a misguided effort to continue to strive to create an unrealistic fantasy world for them to live in. YOU HAD YOUR CHANCE to resolve this amicably but you foolishly let your egos and immaturity get in the way once again. When will you ever learn that YOUR fantastical ideals should NEVER take precedence over solid common sense?
