Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

I support the proposed transportation funding. We have to have a fair way for all users to contribute to road maintenance and major projects. Creating a yearly usage fee for electric vehicles is very wise since an increasing number of vehicles will be all electric or hybrid and it is not fair that those still using antiquated fossil fuels are paying the lions share. I drive a hybrid but plan to move to an all electric vehicle soon so my perspective is based on what is best for ALL Oregonians. I don't like paying taxes but we have to have money to improve our roads and this bill seems like a fair way for everyone to contribute.
