Topic: LC 2

Please raise the road tax. It is not even close to keeping up with inflation Six cents is a quarter of what should be added to the gas tax. ODOT in my experience does a good job - no agency is perfect, but plowing, maintenance, accident response, are all excellent. The EV fee increase makes sense too even though it is counterproductive to the Oregon goal of decreased fossil fuel emissions. At least with the gas tax drivers have some choice. Choose a better mpg vehicle - many can, but like big. Drive less - just be efficient. Go electric - even with extra registration/ use fees, electric driving is far less expensive, and here in the NW virtually pollution free. Please don't be bullied by legislators with false views. Our gas tax is too low. RAISE THE GAS TAX MORE THAN SIX CENTS PER GALLON.

Thank You, John Fischer Eugene OR
