To whom it may concern,

If this bill passes it will ruin the livelihood of so many Oregonians. My husband got a new job at the beginning of the year that included a \$1 bump in his pay. But because of your progressive payroll tax, we don't have any more money coming in because it just goes to taxes. We are barely scraping by as it is and with if this bill passes, we very well may end up homeless. I have three kids and this is terrifying me. We already have to stress about money every single day but this is too much. Instead of passing this bill maybe we should be looking into the mismanagement of the money you guys already receive. This isn't fair to lower class citizens. If you thought the homeless was a problem now, wait until you pass this and it pushes more people out of their homes.
