

NO NEW "road tax". I'm concerned about the proposed gas and payroll taxes in Oregon. This new "road tax" unfairly targets everyday drivers and workers across our state, while billions of dollars continue to be allocated to an agency with unclear priorities and limited accountability. It also doesn't directly address the main problems or ensure that our road funds are used where they're most needed, such as maintaining highways, freight routes, and rural infrastructure.

Oregonians deserve thoughtful, balanced solutions rather than a one-size-fits-all approach. Let's work together to create policies that are fair, transparent, and truly benefit every part of our beloved state.

I am opposed to the new proposed road tax legislation.
