Funding

Measure, Appointment or  
Topic: LC 2

So Tina is going to lower the utility charges for Oregonians, because she cares just so the state can take the savings away with their new transportation package that will pass in the special session?

Oregonians should be the ones that approve any new taxes.

Tina if you really cared about Oregonian livability and keeping affordable you would back this and pull your tax proposal off the table

Nothing will improve with this proposal
