Funding

Measure, Appointment or
Topic: LC 2

I am against adding 6 cents and payroll tax to fund ODOT when they don't all the road tax already allocated and when you make them responsible for things like the homelessness trash along state roads and then you make them maintain bike trails along and even sometimes not in the right away of the state highways. Besides the fact they have spent our tax dollars unwisely in the past for example the "bridge to nowhere" in LaPine. Why should we as tax payers burden anymore of the the Governors pet protects like 800 million to fund homelessness. We can't afford anymore taxes as it is you have increased and added so many over the last year we are now in the top 5 states of tax and the 46th worst state to do business. You have run intel, dutch brothers, and Nike out of town and now you figure the small businesses and the middle income wage earners can just pay more--you miss manage and we pay!
