

Submitter: Charles J Hurliman
On Behalf Of:
Committee: Joint Interim Committee On Transportation
Funding
Measure, Appointment or LC 2
Topic:

When buying a car you can spend as little as \$10,000 on a new car or a half \$1 million on a new car. Both automobiles will get you from point A to point B, while complying with existing laws for safety. Likewise our transportation system can be managed with existing funding, while following existing safety laws. If your department says they can't do it it's time to replace management.
