NO New Road Taxes. This will create such a burden and hardship on my Family. We are already struggling financially with the way the economy is. My husband is disabled and on Social Security, I am stay at home and manage his care.

We can NOT afford these new taxes. Oregon Government needs to PROPERLY manage the funds that are already paid into the road taxes, stop reallocating that money into different areas, keep the money that is paid into certain sections in that section/department. Stop robbing Peter to pay Paul, Stop the WASTEFUL spending and do what is right. The funds to pay Road personal is already there and government needs to spend that money and stop trying to add new taxes which we already know will not go to the proper department/division, as that is being proven already. Oregon has terrible management of its funding and the mismanagement needs to be STOPPED. Get Oregon back on track to the Wonderful state that we know it can be. If the Governor can't keep it right she needs to go, and we all need to remember the troubles she has caused Oregon next time we vote for Governor.

Remember this not only affects my family, it affects families all across Oregon and it needs to be stopped. NO new taxes!!

Thank you for your time concerning this matter.
