

I support the bill: Legislative Concept 2. This is not the time to be taking money away from infrastructure. Commerce (tourism, transportation to/from employment, etc.), safety (medical, fire, law enforcement) and general public well being all depend on our infrastructure being intact, our roads, signage, and all supportive structures must be kept at the highest standards possible to maintain our financial prosperity, health and general personal well being.

This bill must pass, not just for all of us now, but to maintain the promise of a well maintained infrastructure for the future; for our descendants.
