Topic: LC 2

I and everyone i know are opposed to the proposed road tax increases. ODOT needs to be audited, waste cut, and made to live within their budget. This is what every private business and state citizen is required to do. Taxing us more will result in us adjusting our budgets so they can skip that process. Continuing to tax and spend without accountability will only cause more tax paying sources to leave state which in return drives further budget short falls. Now is the time to change the course of a failing state.
