NO NEW ROAD TAX.

i believe that answers and accountability for funds that have already been mismanaged should happen before any new taxes are imposed. It is very disappointing that our government doesn't set an example of how a budget should be handled.

It seems as if the people in the state who are willing to continue to work hard are only continually penalized for doing so. Those of us who are barely making ends meet may not be able to afford to drive to work if we can't afford the gas to get us there anymore. In addition to bringing less home to begin with due to higher payroll taxes. This is absolutely shameful!!

The responsible people of this state need to stop being taken advantage of just so our government doesn't have to be responsible.
