On Behalf Of:

Committee: Joint Interim Committee On Transportation
Funding

Measure, Appointment or
Topic: LC 2

Dear legislators, our transportation is broken. The funding has been mainly from a gas tax established decades ago and doesn't adjust for inflation - making ODOT continually have to cut projects and cut corners in fixing our roads. This has been unsustainable for a long time and now it's come to a head.

The roads are the lifeblood of our economy. We need to drive to work, to school. We need to move products to our stores, resources to our factories. We need to drive to our loved ones and to the great outdoors we love so much in Oregon.

Please stop the posturing and political silliness. This is important to all of Oregonians. Do your jobs and get ODOT funded.
