As I life long Oregonian I am disappointed in this states leadership and the failures of odot.

I have personally worked as a subcontractor for kewitt on the Abernathy bridge project and have seen how they misuse money and have constant delays and nobody seems to care. So we have now tripled the cost of a bridge expansion that nobody will want to use once it becomes a toll bridge and I have been hitting the same pothole on my way to work for about 8 years. Doesn't seem like the system is working well.

Raising taxes and registration fees will do nothing giving odot more money to misuse will only cause more issues down the road.

I'm not happy with Tina Kotex and will definitely be voting republican next election.
