Measure, Appointment or  
Topic: LC 2

I'm appalled by the thought of raising the price on everything related to transportation. The Odot budget is out of control and fail to rein in there spending. Not only can they not pass a budget, the construction and road improvements are poorly executed and always end up over cost. I think the worst part of this plan is doubling the payroll tax. Its already tough enough for employers to pay a decent wage, now you're going to handy cap them even more by doing set action. This delegation is always striving to make thing more affordable in public, yet behind closed doors your trying to milk the public for every last cent we have. Only to keep spending into oblivion. When will you just stop and regroup to make things better for the public. Instead of staying focused on the donors and your unions. From Sodaville and my surrounding communities we are wore out from all the high taxes and cost fuel. Please vote this down
