Topic: LC 2

I strongly oppose this tax hike, because as a first time homeowner that lives in SE Portland, I see other motivated people moving into this area because it's one of the only areas that WAS affordable.

I considered myself having a decent job so I purchased my first home by the end of 2023. Fast forward to now and I am living paycheck to paycheck all while being a single mother providing for my two children not because of outside expenses, but because of HOW MUCH we're being taxed. I am tired of our city being steered in the wrong directions by city officials that are doing the bare minimum for our communities. How can we strengthen our communities when we're consistently taking economic hits in our pockets. Oregonians are fed up and so am I.
