Measure, Appointment or Topic:	LC 2

Dear Committee on additional Gas tax and road use tax. I am apposed to the road usage Tax as proposed. It is very important that it is made extremely easy for people who choose to have the per mile charge on their electric vehicle or hybrid vehicle to use this option done. Make the process extremely easy for the individual who has an electric vehicle to use the per mile method of paying the fee. If this is made complex so that people end up paying more money then is fair then the government and supporting polititians will loose support. And with that the law will be removed in the future with disgust.

Thank you
