On Behalf Of:	
Committee:	Joint Interim Committee On Transportation Funding
Measure, Appointment or Topic:	LC 2

I am writing in support of the transportation funding package to be discussed in the special session this weekend. The Oregon department of transportation provides many critical services to the community, statewide. Building and maintaining public transportation infrastructure should be an cause with bipartisan support as transportation affects all aspects of our lives -- from the economy, to our health, to our quality of life, and more. Such an important cause deserves robust, long-term funding tied to inflation, and the legislature would be remiss to pass up this opportunity. Thank you.
