Funding

Measure, Appointment or  
Topic: LC 2

I am strongly opposed to new taxes for roads. I am opposed to the interstate bridge project that does not include more lanes for auto traffic. without more lanes it solves nothing and is a waste of money.

Many people I know are struggling to keep there heads above water because of high cost of living and new taxes only makes this worse. I am 70 years old and was planning to retire but I felt I needed to keep working so I can help two different families with their expenses. People cannot handle any more expenses.

I think a lot of the problem is that Oregon government mishandles the money they have. It needs to learn to be more responsible and not place any more burdens on its people.

Thank you for your consideration.

Rich
