Topic: LC 2

What Oregon needs right now is accountability not another tax increase. The people who are supposed to be in charge and looking out for our best interest are fools to think by increasing gas prices, increase in vehicle registration fees, increasing payroll taxes, and just increasing anything that has to do with our cost of living is helping Oregonians! The taxpayers of Oregon should not be responsible for bailing out the mismanagement of funds done so by ODOT. Get rid of the waste (executive positions, DEI, etc.) and start allocating the money we've already painfully given to you as it was intended.
