

Submitter: Milton Moran Jr
On Behalf Of: Myself
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

I support HB 3119. Diesel powered heavy trucks, smaller trucks, pickup trucks and recreational vehicles need diesel powered engines now and into the future. We need to celebrate the advances in the diesel engine industry with the development of clean burning technology. We do not want a mandate that gives us no choice when purchasing new trucks. We may spend days away from any types of charging facilities. Oregons rural, forested and desert areas would not be assessable if diesel powered vehicles were to be outlawed. Oregon is already a carbon neutral state. President Trump was elected by the majority due to his beliefs to turn around these policies supporting all electric vehicles, and other environmental mandates that will cripple Oregon and the nation. Give American ingenuity the chance to continue to improve Diesel powered vehicles and equipment that are used in most of Oregon and national industries, agencies and individuals. Don't make mandates. Let us decide what is best for each of us. Don't stop the machines that power Oregon and the nation. Don't stop the industries that pour money into Oregons economy. Support HB 3119. Thank You
