

Submitter: Elizabeth Brooks

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Diesel pickups are essential to our farming operation, which is 15 mi apart. From hauling fuel to tractors, seed from the warehouse to the field, workers from field to field, supervising workers and irrigation with needed supplies on hand. Trips across the state and even the Midwest for parts needed on a moment's notice. Farmer's are essential for feeding you and many others. There are no equivalent vehicles to match the hauling capacity of our pickups.

Please drop rules, there should be no hindrance by rule or law in regards to equipment needed to grow our crops.
