

Submitter: Rebecca Dowd
On Behalf Of: Skyline Memorial Gardens
Committee: House Committee On Behavioral Health and Health Care
Measure, Appointment or Topic: HB3127

I fully support House Bill 3127, as it allows funeral directors to better serve families in a timely and efficient manner. Requiring funeral directors to leave the workplace to hand-deliver death certificates for medical review and signature, and then return to retrieve them, creates unnecessary hardships for both the families we serve and our company. This process diverts valuable time and resources from other important tasks that require our attention.

Additionally, death certificates are a crucial final piece for families to gain closure and process important information necessary for legal and financial matters.
