Measure, Appointment or Topic: HB3119

To whom it may concern,

I am writing in SUPPORT of this Bill to PROHIBIT the Diesel Ban from going into effect. We farm. There is no way we could farm without diesel trucks. THERE ARE NO ELECTRIC FARM TRUCKS! Nor will that ever be the case. I drive a diesel RV. I will not be giving that up. You have NO business telling Oregonians what to drive. On top of that, we have nowhere near the infrastructure to charge mass commercial vehicles. ZERO - NONE. We've been told to expect rolling brownouts from PGE in the future as they can't keep up with the demands with the unworkable mandates you have put on them to go completely Green. Never mind I'm paying nearly 50% more for electricity from 2018 - thanks for that by the way. You're telling me there will be the electricity to support this nightmare? How do you propose to put groceries on shelves? Get crops in? Move merchandise? The whole idea is outrageous and I will not comply. Get out of the way of the people of Oregon to live and work well.
