

Submitter: Matthew Alexander
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3119

I urge the members of the committee to act with the urgency made necessary by the climate crisis and to vote against this measure. We should not shield the pocketbooks of these few corporations from the impacts that their way of doing business has on the environment. You should not mandate a regulatory delay to 2027 because 2027 is not soon enough to act.
