

Submitter: Rebecca Ricks

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Please pass HB 3119 to delay the Advanced Clean Trucks regulations. As an owner of a business in the heavy equipment industry, I know first-hand that diesel power is essential to construction work. There are no viable electric options, and certainly nothing that would be affordable in the coming years. Our electric grid is not prepared for the adoption of small EV's let alone large vehicles that require high horsepower. As new technology is developed, and the electric grid is improved, the market will naturally adopt vehicles that do not require diesel power. It does not need to be mandated.
