

Submitter: Kayla Warlick

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Diesel trucks are an essential tool for those involved in essentially every industry throughout the state and the nation. The elimination or reduction of the production of diesel vehicles would be astronomically crippling to the economy as well as to the community that rely on these vehicles. Electric vehicles are NOT the answer to reducing pollution and are not in any way shape or form a competent alternative to our current vehicles.
