

Submitter: Jan Zuckerman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Oregonians have already suffered from some of the worst air quality in the nation due to diesel pollution. If the state grants a two year delay, many more will needlessly suffer and die. What kind of message do we tell our children when we choose to delay rules that we know will keep them healthy? Please take a stand and oppose HB 3119 and SB 509.
