

Submitter: Necole Ontko

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

I support HB 3119 because as a Rancher we rely on diesel engines! And not only that diesel engines are so much cleaner and more efficient than what they once were in the past. Electric diesels are not going to cut it when it comes to what a true diesel engine was supposed to do. Especially when we live in a rural area and all of our school buses are diesel can you imagine a school bus being an hour and 45 minutes from town for some of these kids in the middle of winter and negative degree temperatures and running out of charge? I can't believe that we adopted this from California. Our Government should never have a say in what people drive or utilize in their day-to-day lives, they should never be able to force people into having to purchase something to continue their livelihood.
