

Submitter: Linda Melgoza

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Electric only cars is a horrible idea for our country.

1. There would be roving power outtages everyday.
2. People would end up with stalled cars because their charge ran out.
3. Hugely expensive - most people couldn't afford it and would have no means of transportation.
4. What would happen to all the current cars? Just throw them in landfills?
5. Individual persons would have lost thousands of dollars on their current car they paid for/are paying for.
6. Effect on atmosphere?

Really really bad idea.
