

Submitter: Jannie Hornby

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB3119

I support this bill because of the cost to Oregonians for something that makes no sense at this point in time. PLEASE stop trying to be green when the costs outweigh the common sense outcome. I could go on with details, statistics, and facts but you should already know them. We are not financially ready to go all electric due to the technology being cost prohibitive. Please support this bill. Thank you.
