Measure, Appointment or

Topic: HB3119

Hello Committee members:

I am a small business owner mechanic and welder for heavy equipment .

Bottom Line: We use many trucks and equipment that are diesel fueled. In our environment and location diesel fueled machines are necessity. The notion of restricting equipment we must have to operate is nothing short of absurd.

I support fully HB 3119 to hold back Oregon's intentions to restrict the use of diesel powered equipment. Oregon MUST move away from it's crash vector based on CO2 as a greenhouse gas. It is not a green house gas. It is also not honest calling this an "emergency" and bypassing the public. I am putting this in writing only because I have driven the 6 plus hours to Salem to give testimony only to find out that it was not allowed again .This is the 5th right of our 1st amendment. This is the peoples house we did not sign up for this overreach in our free Republic. Government of the people for the people by the people.

Please support HB3119 for all of us.

Thank you Scott DeCarlo
