Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

As a farmer and truck operator, I support this bill farmers and trucking companies cannot afford to update all their equipment to these newer models that are not reliable get worse fuel economy and break down and cost way too much money to fix. Transportation is already too expensive as it is as everybody complains About the price of goods if this goes through, it will bankrupt many companies and make goods more unaffordable. I own both newer and older equipment and the older equipment is more reliable, and I am able to fix on my own versus the new emissions equipment that has to go to a shop with dealer locked software to fix the emission part of the vehicle sadly, that is what mostly fails on newer equipment, and vehicles And prohibits the vehicle from operating
