

I am the curator for the Delbert Hunter Arboretum and the daughter of Delbert Hunter. The arboretum is seven acres of native plants of Oregon. I use the website to ensure I have the correct names of native plants and to research habitat for recommendations of plants to add to our gardens. This is also my reference for adding to the new digital inventory, I am working on for the arboretum. I urge you to please support Oregon Flora Bill, HB3173.

Thank you very much,

Sue Rohde
