

Submitter: Mary Betts
On Behalf Of:
Committee: Senate Committee On Natural Resources and
Wildfire
Measure, Appointment or Topic: SB747

Once again the legislature is trying to push through a bill that directly affects farmers and/or ranchers limiting their use of fertilizer and applying heavy fines if violated. Were any of the farmers asked to submit information, reasons etc. on this bill? I think not. I believe it was once again one of those doing it in the dark and then letting those most directly affected know at the very last moment, to hinder or stop their opposition to this bill. I firmly believe this bill is more about pushing through environmentalists' wants instead of looking at scientific data and valuable input from farmers. I would ask that the committee vote No on this bill and let it die a natural death!

Sincerely

Mary Betts
