

Submitter: Jan Wilson
On Behalf Of: My children and grandchildren
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2980

We wholeheartedly support this bill, which will bring a scientific approach to wildlife management that prioritizes ways for people and wildlife to coexist. We love having wildlife as a part of our lives and support the organizations working to protect them and their natural habitats, even as human development continues to encroach on it. It is our responsibility to protect wildlife from our human developments, and to limit or eliminate the activities that negatively affect them and their habitat. Thanks to the environmental organizations that advocate for this important work!
