

Submitter: Josh Gulange

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or
Topic: SB747

February 5, 2025

To: Chair Golden, Vice-chair Nash, and members of the committee:

The health of the people who live and work in these rural communities is more important than the profit or losses of these farm businesses. The science shows that nitrate poisoning of the earth harms the water and our health. We must follow the science and not choose the interests of business over those of the people.

I urge your yes vote on SB 747 to help our state get a handle on what is causing nitrate contamination in rural drinking water.
Thank you for your time.
