

Submitter: Lynne Matejcek

On Behalf Of:

Committee: Senate Committee On Natural Resources and  
Wildfire

Measure, Appointment or  
Topic: SB747

Oregon's drinking water, rivers, and ecosystems are at risk from unregulated fertilizer use. I all who serve our State in Salem to do the same- to support SB 747 which will require large landowners to report fertilizer application, increasing transparency and helping prevent harmful runoff that contaminates water and harms public health.

I also ask that legislation be put forth the end the use of harmful, toxic fertilizers and GMO products used on Oregon soil; our collective need for clean ground water and to protect stream, plant and animal habitats and Salmon life cycles, is more important than personal profit and lack of moral conduct resulting in poisoning our adjoining and public lands and waters.

Thank you for your time and action to protect Oregonians and our next generations of children, plants, animals, birds and Salmon.

Sincerely,

Lynne CM
