

Submitter: Oregon Nurse
On Behalf Of:
Committee: Senate Committee On Labor and Business
Measure, Appointment or Topic: SB916
RE: Support for SB 916

To the Senate Committee On Labor and Business,

I did not want to strike and was praying providence would be reasonable and do everything they could to prevent the strike. Instead they spent their time arranging for scab RN and all their accommodations, it was just sickening. Providence has not shown any signs they care or want us back. We want to come back to safe working environments that are properly staffed. We are looking out for quality patient care, safe working conditions, and good healthcare. They haven't been listening and going on strike seems like the only way to get their attention and a huge financial sacrifice to of us. Being compensated with unemployment helps the impact of the financial stress we are going through.

Thank you for accepting my testimony and I look forward to your support,
Oregon Nurse
